SUMMARY

Game development student focused on gameplay programming and systems design. Actively building Unreal Engine prototypes and designing gameplay mechanics for personal projects, including a soulslike-inspired combat system featuring stance-based risk-reward mechanics.

SKILLS

- | | | |
|-----------------|--------------------|-----------------|
| • Unreal Engine | • Unity | • C++ |
| • C# | • Python | • TypeScript |
| • JavaScript | • React | • Next.js |
| • HTML/CSS | • Visual Studio | • Git/GitHub |
| • Blender | • Gameplay systems | • Combat Design |
| • prototyping | • mechanic design | |

ACADEMIC EXPERIENCE

Solo Developer

Soul Rend, Full Sail University

- Action RPG (soulslike-inspired) focused on high-intensity, risk-reward combat design.
- Designed core gameplay loop centered on risk-reward combat decisions.
- Developed dual-state combat system (Judgement / Rend) emphasizing adaptive playstyles.
- Built early gameplay prototypes in Unreal Engine, designed combat interactions, and system structure for player progression.
- Created and maintained design documentation for core mechanics and systems.

Systems Developer

Clock Work Trials, Full Sail University

- Developed puzzle-based prototype where players navigate mapped levels to disarm enemy obstacles.
- Engineered time-loop mechanics, interactive gameplay systems, and implemented core mechanics supporting gameplay structure.
- Assisted in Unreal Engine prototyping, system iteration, and contributed to gameplay flow including puzzle design structure.
- Reviewed play-tester feedback, corrected visual effects such as assets, and reconfigured enemy AI combat sequences.

EDUCATION

Bachelor of Science in Game Development (B.S.)

Full Sail University, Winter Park, FL

December 2026
